# Documentation for Notification Service

Endpoints
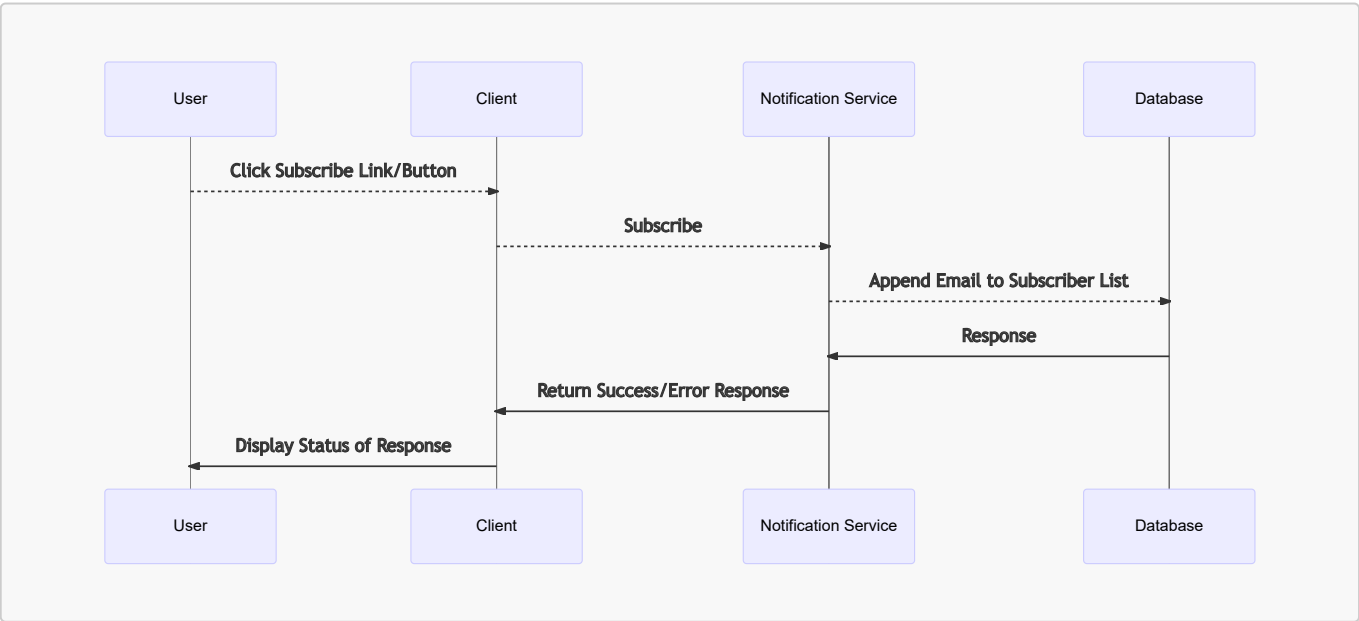

invite

An admin, moderator, and speaker can uplaod a file which can be parsed into an array of objects containing the relevant information to send out a single invitation to all contacts who are not unsubscribed.

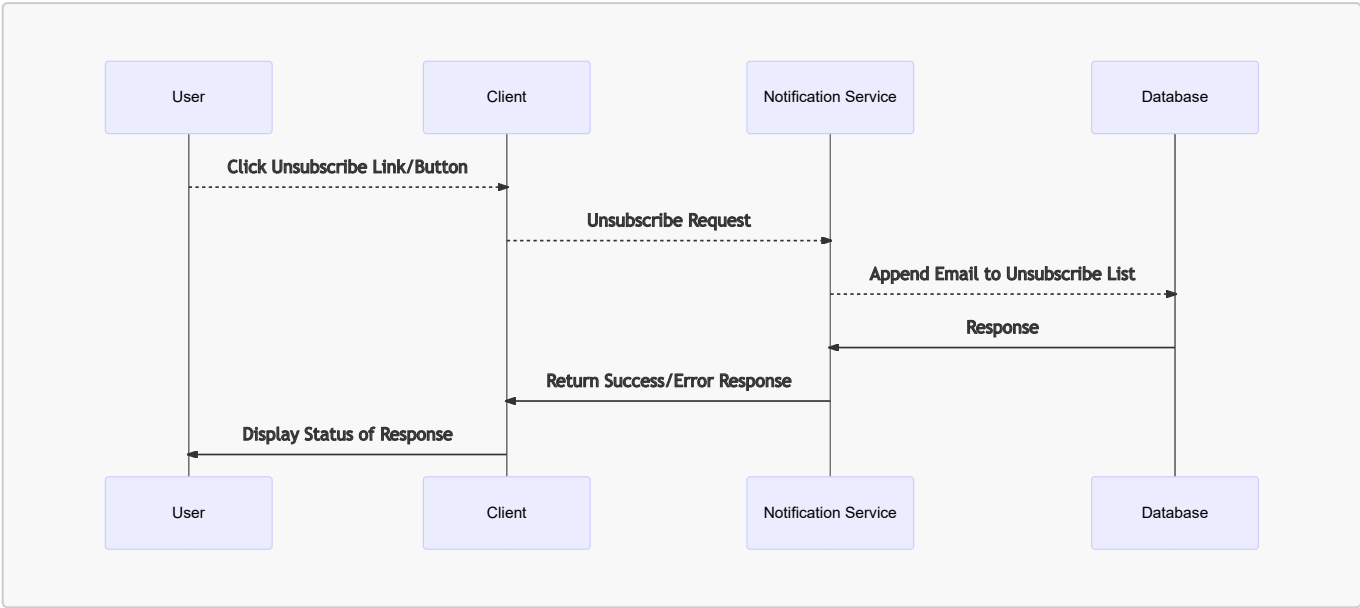

subscribe

An admin, moderator, speaker, and user can subscribe to get notifications sent to their email.

## unsubscribe (Embeded Info In Link)

An admin, moderator, speaker, and user can unsubscribe to prevent getting any notifications sent to their email. This should be doable via a link embedded into each email.

Scheduled Jobs

Reminders/Notifications (Using RabbitMQ)

Permissions

Roles: admin, moderator, speaker, user
